Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 2 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

	6) <input type="checkbox"/> Other: _____

1. This application is in condition for allowance except for the following formal matters:

Please see the following statement.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

2. This application does not contain an abstract of the disclosure as required by 37 CFR 1.72(b). An abstract on a separate sheet is required.
3. The spacing of the lines of the specification is such as to make reading and entry of amendments difficult. New application papers with lines double spaced on good quality paper are required.
4. The disclosure is objected to because of the following informalities: the underline for numerals in the specification should be deleted. Underline is used for insertion in amendment requirement.

Appropriate correction is required.

5. The claims are objected to because the lines are crowded too closely together, making reading and entry of amendments difficult. Substitute claims with lines one and one-half or double spaced on good quality paper are required. See 37 CFR 1.52(b).

6. Claims 1-5 are objected to because of the following informalities:

1. A claim should only contain one sentence with a period at the end of the claim.

Claim1 contains three sentences with many capital letters.

2. Quotations marks in a claim are improper and should not be used in any claims.

3. The preamble of all dependent claims must be consistent with the independent claim. In this case, the preamble of claims 3-5 differs with the preamble of claim 1.

4. Claimed subject matters in a claim must be recited clearly. The phrases "as indicated in claim 1A" and "in claim 1B" are not clear and improper. For example, "said strip in claim 1B" should be recited as said overlaying strip to distinguish it from base strip. The base strip is already recited previously, and there is no need for the phrase "as indicated in claim 1A" to identify the subject matter.

5. The phrases "will cover" and "capable of" in claim 1 are indefinite. Definitive verb must be used, such as "covers" and "are being sounded".

6. Regarding claim 4, a dependent claim must be recited as a dependent claim of claim 1, not 1B.

Appropriate correction is required.

7. The claims are allowable over the prior art for at least the reason that the prior art fails to reasonably teach or suggest in claim 1 that a base strip having a length and width of flexible ferrous magnetically receptive material element with or without polarity and self-adherent by means of adhesive backing attached to the top side of the neck adjacent to the fingerboard spanning the entire length of the fingerboard; an overlaying strip covers the base strip having a length and width of flexible ferrous magnetically receptive material element with or without polarity and with denoted information to play musical scales of different keys as set forth in the claimed combination.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shih-yung Hsieh whose telephone number is 571-272-2065. The examiner can normally be reached on 7:00-3:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Martin can be reached on 571-272-2107. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
